Education

Ontario Tech University Oshawa, ON

Bachelor of Engineering, Software Engineering; GPA: 3.9/4.3 *Sept. 2023 – May 2028*

- **Awards:** President's List (3x), Entrance Scholarship Award and In-course Scholarships based on GPA
- **Relevant Coursework:** Algorithms, Data Structures, Databases, Software Design & Architecture, Artificial Intelligence, Object-Oriented Programming, Web Programming

Experience

Software Developer Intern Sept. 2025 – Aug. 2026

BMO (Bank of Montreal), Technology Research & Innovation *Toronto, ON*

- Developed and deployed features for an internal innovation platform using Power Apps, Power Automate, HTML/CSS, and JavaScript, supporting 2500+ idea submissions and 50+ competitions across 7 lines of business.
- Architected a business problem creation feature for activity admins, generating 25+ reported business problems and establishing measurable outcome tracking across the innovation platform.
- Identified and mitigated a data-integrity risk where non-delegable queries silently truncated results past Power Apps' 2,000-record limit by auditing affected formulas and establishing a tracked remediation repository logging each query's impact level and fix.
- Automated idea assignment and manager notification system using Power Automate, enabling end-to-end idea tracking from submission through implementation, establishing a pipeline to quantify the business value of approved innovations, and driving platform adoption upon feature delivery.

Governance Administration May 2025 - Aug. 2025

Ontario Tech University, Office of the Secretary and General Counsel *Remote*

- Supported the creation and launch of the University Secretariat's public-facing website by designing and organizing content to improve clarity, accessibility, and navigation.
- Identified a recurring issue with invalid academic appeal submissions and designed a guided intake process that prevented misdirected submissions before reaching staff review.

Software Developer Dec. 2023 - Aug. 2025

Ontario Tech Racing, FSAE (Formula Student) *Oshawa, ON*

- Developed UI software with React to streamline access to computational fluid dynamics simulations, improving engineering analysis efficiency.
- Redesigned and implemented a new website using JavaScript, HTML, and CSS, improving team visibility and navigation for sponsors and members.

Projects

F1 Head-to-Head - Driver Comparison Dashboard | *Python, React, Pandas, FastAPI* Aug. 2026

- Designed and built a full-stack web app that pulls live Formula 1 race data and lets users compare two drivers' performance across a race weekend.
- Built a router/service-separated REST API exposing 5 endpoints, and filtered to valid flying laps only so pace averages excluded pit and safety-car laps.

XP Reviews - Game Review Website | *HTML, CSS, MySQL, JavaScript, PHP* Nov. 2024

- Implemented MySQL databases to securely store and manage more than 30 game records and store user-submitted reviews.

Technical Skills

Languages: Python, Java, C++, SQL, JavaScript, HTML/CSS, PHP
Frameworks: React, FastAPI, Pandas
Databases: MySQL, PostgreSQL, MongoDB
Tools/Platforms: Power Apps, Power Automate, Power BI, Git, GitHub, JetBrains IDEs, VS Code, Jira
